There will be 3 participants per country, Turkey 4 and Estonia 4.

General information

Nowadays ICT (information and communication technology) is part of most of the people every day life and very many processes are connected with internet, technical equipment, communication. Information flow is all day round, 24/7.

Multimedia systems, ICT have the ability to cut down the time of learning while at the same time increase learning effectiveness.

United Nations document Youth and ICT says that technology – specifically ICT – has played a central

role in young people's rise to prominence on a global scale. It has helped them mobilize, collaborate and given them a voice where there was none before.

Youth workers and youth organizations need new knowledge, sharing the best practice to increase their skills in using of ICT and create new ways in their work with young people. Wisely implemented ICT methods increase youth work methods impact to young people and the community. Increasing ICT skills and share best practices is one of the Erasmus+ program priorities. New ideas how to disseminate project result and also new methods in learning process is needed in Erasmus+ program projects.

These partners are from over Europe and they are active in local youth work and international partnership working with different target groups. They have long lasting experiences in the youth field and they need new input to go on new tools in their work.

This course introduces participants to a variety of new media tools and platforms used in the collection, presentation, verification, and dissemination of information. Participants have the chance to practice using these tools through interactive activities and group work, while learning about cyber-security to protect information and sources. New web-, mobile-, and internet-based media and information dissemination platforms are constantly evolving, producing increasing amounts of content.

During the project we learn different methods in youthwork according to youth activities and project process – involving the youth, create activities, implementing, disseminating and evaluating process.

After this project all participants has broader and more specific knowledge and skills how to use innovative ICT tools in youthwork activities and project work. This course support using new media in youthwork, increase youthorganizations ability to make youth activities more attractive for young people, teaching them to use new tools and support this way young people skills development and situation in labour market. Using new tools wisely support making youthwork and Erasmus+ program more visible.

Practical information

Getting here:

From Tallinn airport:

There are buses in every few hour from Tallinn bus station to Võru (closest town to Rõuge). Take bus nr 2 in front of the airport and get off in the third station (Autobussijaam).
